MESO **BB·GLOW**

luminosity

MESO **BB·GLOW** *luminosity*

Revolutionary **cabin treatment** that in a few sessions achieves a **porcelain skin** with make-up effect to show 24 hours a day.

What is MESO BB Glow?

MESO BB·GLOW is a rejuvenating facial treatment that provides an immediate brightness and porcelain skin effect thanks to its powerful and 100% safe and natural ingredients introduced in the skin with the microneedling technique.

It has all the advantages of a high-end cosmetic treatment and none of the disadvantages of conventional make-up (suffocated skin, clogged pores, etc.)

Does not cover blemishes, it blurs and removes them progressively. It lightens spots since the first session, reduces wrinkles, treats dilated pores, removes redness, provides brightness and moisturising improving immediately dull, suffocated and dehydrated skins.

It is not a semi-permanent make-up or a flash treatment to be applied at special moments.

What is the treatment?

- Diagnosis.
- Removal of make-up, cleansing and tonification.
- Chemical peeling that will remove the skin horny layer to allow subsequent cell renewal.
- Application of BB GLOW treatment with microneedles.
- Application of soothing plasma skin veil or mask.
- Application of shark-sauce serum or dragon blood cream.
- Application of SPF50 finish cream.

DAILY CARE KIT

CONTAINS:

- Multifunction shark sauce serum of 30 ml
- Treatment colour cream
CC, DD or EE SPF 50, 50 ml
